INVENTOR : ARASHI SHIZUO;

INT.CL. : B32B 1/00 E04D 5/12

TITLE : SHEET SUBSTANCE

ABSTRACT : PURPOSE: To enhance workability, water prevention, securing strength and so forth by forming reinforcing parts in the proximity of, at least, both ends in the longitudinal direction of a sheet such as an asphalt felt or the like.

CONSTITUTION: The sheet substance A consists of a sheet constituted of laminating one kind or two or more kinds, e.g. of asphalt felt, asphalt roofing, felt, windbreak and moisture prevention sheet, etc. Herein, a sheet subjected to a flame retardant treatment is available, and reinforcing parts 2 are formed every stripe at both ends with respect to the longitudinal direction and having the width of the order of 20-30mm, and the material is made of synthetic resin band (PP band or the like), synthetic resin yarn, cloth, non-woven fabric, felt, and so on. In this way, some effects are given. such as non-flutter against wind, easy execution, large securing strength, perfect water prevention, and no fear of water leakage and the like.
